

Large size butterfly valve installation

Transport and Handling

Special care should be taken when handling and transporting the large size InterApp butterfly valves Desponia®, Desponia® plus and Bianca. Local regulations as well as the necessary safety measures must be observed at all times.

The weight of the butterfly valves Desponia®, Desponia® plus and Bianca is shown on the technical datasheets.

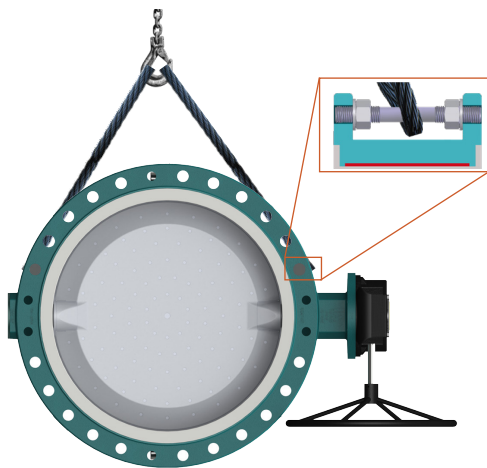

Due to their weight, special care should be taken during the installation of the valves, and the use of lifting devices, ropes, slings, etc... should always be considered.

For these operations the installation personnel should wear the necessary protection equipment as per the local regulations and follow the local safety regulations.
