

Description

Centric butterfly valve with elastomer liner for liquids and gases in the industrial range, general services, water treatment, ...

Product features

- Body construction D1 Wafer DN 25-1000
D3 Lug DN 25-600
D4 U-section DN 150-1800
- Face to face dimension according to ISO 5752/20, EN 558-1/20
- Design according to EN 593 / API 609 category A (under request)
- Top flange according to EN ISO 5211
- Max. working pressure 16 bar (20 bar on request)
- Rating PN6, PN10, PN16, ANSI cl. 150
- Temperature range -20°C ÷ 140°C according to material (200°C on request)
- Tightness test according to EN 12266-1/P12 leakage rate A, test fluid water according to API 598 (under request)

The butterfly valves DESPONIA® meet the safety requirements of the pressure Equipments Directive 2014/68/UE (PED) appendix 1 for fluids of the groups 1 and 2

Butterfly valves DESPONIA® are suitable to be operated in safety related systems according to IEC 61508 / 61511, Safety Integrity Level SIL 2

Special versions of DESPONIA® valves may be used in potentially explosive atmospheres

FDA & EC 1935/2004 Different liners and disc are in compliance with FDA and EC 1935/2004

Fugitive emission EN ISO 15848-1 compliant for selected materials

FF and LF Special executions without painting adhesion interfering substances and without any grease

Construction

1	Body (extended valve neck allowing insulation)
2	Blow out proof shaft with position indication
3	Disc
4	Exchangeable liner with sealing grooves on the tightening face
5	Shaft bearing (DN25-400 Resicoat®, DN450-1800 Bronze)
6	External shaft sealing
7	Retaining washer (blow out protection)

Kv values m³/h

Opening angle of the valve

⑨	Special execution	BL	Vulcanized bonded liners on request	DN 450 -1800

1) For temperatures between 110 and 140 °C, the valve is only tight up to next lower pressure class (e.g. PN16 valve, max. 10 bar)

2) NSF-61 approved when used in combination with EE liner

200 ¹⁾	HLA.F0717.340-C1	244	340	66	0,7

1) Consideration for DN100

- In general, DN 100 should be used with 340 handlever (HLA.F0711.340-C1).
- In cases where a DN 100 with 210 handlever (HLA.F0711.210-C1) is required, it can be done only for not severe conditions.
- If the 340 size is not possible to be used while working in severe conditions, it is recommended to use a gearbox (i.e GB232-05.F05-F0711.100).

2) General consideration for big sizes (DN 125-DN 200)

- DN 125 and DN 150 PN 16 for severe conditions are recommended to use with a gearbox.
- DN 200 PN 6 - PN10 for normal conditions are recommended to use with a gearbox.
- DN 200 for severe conditions and DN 200 PN16 for normal conditions must be used with a gearbox.

Material:

GB232 : Aluminium, Polyurethan coated
GB880-GB6800 : Cast iron, Polyurethan coated

* n = Handwheel turns ON/OFF

Installation at the end of a line

When installing the valve at the end of a line please consult document Installation/Maintenance DESPONIA®.

Further documentation

Pneumatic actuators, Electric actuators, Accessories according separate data sheets.

Installation guide, Maintenance guide, Flanges: Please consult these guides for the installation and maintenance of our butterfly valves.

The technical data are noncommittal and do not assure you of any properties. Please refer to our general sales conditions. Modifications without notice.
