PTFE-lined, PFA overmoulded disc

Desponia® butterfly valves

EPDM-lined, Nickel Aluminium Bronze disc

Neptunia check valves

Nickel Aluminium Bronze

Ball valves

stainless steel

Actuators

pneumatic and hydraulic

High quality solutions and first-class logistics are essential to meet the tight projects schedules in the marine business.

Ecospray Technologies, specialised in developing innovative high-performance systems, has made a name for itself in the marine industry by providing a wide range of exhaust gas cleaning solutions. The advanced and proven systems include DeSOx, DeNOx and diesel particulate removal to meet the most severe emissions limits for both SOx and NOx.

For its worldwide on & offshore projects, Ecospray Technologies sets on reliable technical partners capable of supplying on time the necessary products to the various destinations. Whether for retrofit or newbuilding, InterApp's butterfly valves, check valves and ball valves convince since more than 7 years.

With the supply of over 100 projects and thanks to their collaboration, Ecospray and InterApp make a significant contribution to reduce emissions and protect the environment.

Desponia®, EPDM-lined butterfly valve and Bianca, PTFE-lined butterfly valve
